

PROFESSIONAL SUMMARY

Motivated and detail-oriented Full Stack Developer (Fresher) with a strong foundation in HTML, CSS, JavaScript, and React.js, along with backend development using Node.js and Express.js. Hands-on experience in building responsive web applications, developing RESTful APIs, and integrating MongoDB databases. Familiar with authentication, CRUD operations, and API integration. Passionate about writing clean, maintainable code and eager to contribute to dynamic development teams while continuously learning modern full-stack technologies.

SKILLS

- **Frontend:** HTML5, CSS, JavaScript (ES6+), React.js, Bootstrap.
- **Backend:** Node.js, Express.js, REST APIs.
- **Database:** MongoDB, SQL (Basic).
- **Version Control:** Git, GitHub.
- **Tools & Platforms:** VS Code, Postman, Chrome Dev Tools etc.
- **Concepts:** Responsive Design, DOM Manipulation, Authentication (JWT), CRUD Operations, API Integration, Async/Await.
- **Deployment:** Netlify, Vercel, Render & GitHub.

EDUCATION

SRI CHAITANYA JUNIOR COLLEGE

Intermediate

2017 – 2018

JNTUK UNIVERSITY

Computer Science & Engineering

2018 – 2022

CERTIFICATIONS

- **Java Full Stack Development – J Spiders (2022–2023).**
- **Front-end Developer Internship – Code Alpha (Unpaid).**

PROJECTS

JavaScript Mini Projects

- Developed multiple mini projects including To-Do List, Calculator, Weather App & Snake Games etc.
- Practiced DOM manipulation and event handling
- Focused on responsive UI and reusable components

Task Management Application (Full Stack)

- Developed a task management system using React.js, Node.js, and Express.js etc.
- Created RESTful APIs for task creation, update, deletion & manage Created Tasks.
- Implemented user authentication (JWT) and protected routes.
- Integrated MongoDB for storing tasks and user information.
- Added CRUD operations with real-time UI updates.

MOVIX Movie Application (Frontend + API Integration)

- Built a movie browsing application using React.js and REST APIs.
- Integrated third-party movie APIs to display trending and popular movies.
- Implemented search functionality and dynamic routing.
- Used async/await for efficient API data fetching.
- Applied responsive design principles for better user experience.

Food Delivery Web Application (Full Stack)

- Developed a full stack food delivery web application using React.js, Node.js, and Express.js.
- Displayed available food items for users to browse and select.
- Implemented add-to-cart functionality allowing users to choose desired food items.
- Built dynamic cart system to show total selected items and overall price.
- Provided option to remove items from cart and update total amount in real-time
- Designed responsive user interface for smooth experience across devices.
- Implemented CRUD operations and integrated MongoDB for data management.
